

# The Digital Companion for Personalised Learning at School

We are committed to uplift the quality of deliverance on and off classrooms. We offer a unique three pronged approach to Evaluate, Educate, and Elevate a child

# Every student is unique

They absolutely require personalized one-on-one attention. Is the current school system fully equipped to enable personalized learning?

## 01 Classrooms

Most classrooms have just become lecturing rooms, just a learning space.  
How much is learnt has become secondary.

## 02 School Bandwidth

Syllabus not being covered in the most effective way due to the immense student-teacher ratio.  
There are also severe time constraints ironically coupled with time-intensive activities.

## 03 Tutions

It was supposed to be a one-to-one learning space. It has become a second-school.  
Attending these coaching classes results in no time for extracurricular activities.

## 04 Learning pace

Each student learns at their own pace, it is tough to keep up with classroom learning or tuitions. Not viable for classroom teaching to match the pace of learning of each student.

## 05 Learning Apps

There are a lot of apps available but they are not designed to bridge all aspects of a school.  
Apps available don't collaborate with all the four stakeholders (the teacher, the parent, the student, and the management).

## Mission

UpSchool is committed to be the digital companion to schools, focused on enriching the whole schooling experience and empowering personalized learning at school

# UpSchool Approach

Learning experience aligned with school syllabus for every subject, unit, and chapter. The concept focused design in our application enables each child to grasp data at every level.

## 01 Pre-Learning

- ▶ Bridging the concepts of lower levels to current level at each chapter
- ▶ Updates the student to the basic level of understanding before a concept starts
- ▶ Pre Learning is further segregated into two more steps the student has to climb to proceed

## 02 Pre-Assessment

- ▶ Confidence builder for students before the class
- ▶ Students are segmented based on their learning potential
- ▶ Consist of Multiple Choice and Open ended questions

## 03 Classroom Experience

- ▶ Students have context
- ▶ Teachers know their students better
- ▶ More time in class to actually discuss the subject

## 04 Post Learning

- ▶ Complementary learning content to match students pace
- ▶ Post learning kicks in only after the necessary learning of the concept is completed
- ▶ Comprises of segments with topics and subtopics necessary for a more complete understanding of the concept aided by digital cards and videos

## 05 Post-Assessment

- ▶ Self assessment of students on their learning in the classroom
- ▶ If not satisfied, can always go back and re-learn the whole thing
- ▶ Consist of Multiple Choice and Open ended questions

## 06 Revisions

- ▶ Revise at right time, right chapters, and in the right order
- ▶ Stay confident and prepared
- ▶ Frequently asked questions in exams, segmented chapter and topic wise

## 07 Personalized Worksheets

- ▶ Hand writing experience, to test the student's answering ability in descriptive format and get him/her to practice on the topics. Sheets are designed to test the students mettle

# Connected System

The four pillars of the education system: Parent, Teacher, student, and school management are well connected through the platform

## Parents

- ▶ Reporting and visibility of students' learning status
- ▶ A special idle/inactivity report, or a completion report is available for parents too

## Teachers

- ▶ Knows the classroom better than before and can do one-to-one
- ▶ Teachers get real time data of the level of understanding of a concept for each student

## School Management

- ▶ Can track and manage classrooms better than before
- ▶ Better visibility into the students' learning and their test outcomes

## Student

- ▶ Digitally empowered student with confident learning skills
- ▶ Equipped with the solid foundation and courage to face challenges

# Enablement

Key building block of UpSchool. Enabling UpSchool mission to enable next generation school experience and empowering personalized learning

## UpSchool Digital Platform

- ▶ Equipped with the latest technology.
- ▶ UpSchool provides a level of Artificial Intelligence which helps students achieve their optimal pace.

## UpSchool Learning Content

- ▶ Designed to achieve a balance between conceptual learning and scoring marks.
- ▶ Confidence builder for both Students & Teachers.
- ▶ From the best academicians and teachers.

CBSE Syllabus - 8th, 9th & 10th Grade

## Tablet / Laptop

- ▶ We are delivering our platform across laptop ( Android ) and tablets depending on the need of the school management
